About the Authors ..... *ix*

Introduction ..... *xiii*

Chapter 1 Welcome to ColdFusion MX 6.1 ..... *1*

A Brief History of ColdFusion *1*
Integration with Studio MX *2*
Integration with Dreamweaver *3*
The ColdFusion MX 6.1 Server and CFML *4*
Installing the ColdFusion MX 6.1 Server *5*
The ColdFusion MX 6.1 Administrator *8*
Setting Up a Site in Dreamweaver MX 2004 ..... *14*
Getting Started with CFML *17*
Summary *20*

Chapter 2 Databases and Dreamweaver MX 2004 ..... *21*

Different Kinds of Databases *22*
Using an Access Database *24*
Getting Started with SQL Queries *28*
Setting Up a Data Source *32*
Using Dreamweaver MX 2004 to Create Queries *34*
Using Dreamweaver MX 2004's
  Advanced Recordset Interface *37*
Summary *45*

Chapter 3 Introduction to ColdFusion Markup Language *47*

Introducing CFML *47*
Understanding Common ColdFusion Tags *53*
Summary *83*

Chapter 4 ColdFusion Variables and Logic *85*

Variable Scopes *85*
Data Types *94*
Functions *97*
Summary *131*

Chapter 5 Form Processing *133*

Getting Started with Form Processing *133*
Server-Side Validation *136*
Creating an E-mail Feedback Form *142*
Working with File Uploads *147*
Forms and Checkboxes *153*
Multiple Submit Buttons *155*
Using Pre-built Server Behaviors *158*
Logging Out Users *166*
Restrict Access to a Page *168*
Insert Record *171*
Check New Username *174*
Summary *176*

Chapter 6 Database Manipulation *177*

Recordsets and Dynamic Tables *177*
Adding an Edit Page *180*
Building an Insert Page *184*
Recordset Paging *188*
Creating a Dynamic Image Gallery in ColdFusion *198*
Advanced SQL Topics *204*
Summary *215*

Chapter 7 Maintaining State *217*

Using Cookies *217*
Session Variables *221*
Application Variables *231*
Client Variables *240*
Understanding Cookieless Sessions *248*
Summary *251*

Chapter 8 Exception Handling with CFML *253*

Configuring the ColdFusion Administrator to Handle Errors at the Server Level *254*
Using <cferror> to Handle Errors at the Application Level *256*
Using <cfcatch>, <cftry>, <cfthrow>, and <cfrethrow> to Build More Robust Exception Handling *259*
When and How to Define and Handle Custom Exceptions *263*
Best Practices and More on Structured Exception Handling *266*
Debugging Using the ColdFusion Administrator Debug Settings *267*
Using <cftrace> to Debug an Application *269*
Using <cfdump> to Debug Applications *272*
Using <cftransaction> to Protect Data Integrity *274*
Summary *277*

Chapter 9 Dreamweaver MX 2004 Extensions *279*

Exploring Extensions *280*
Yaromat Check Form *284*
Massimocorner CF Upload *288*
Dreamweaver's Server Behavior Builder *292*
Summary *301*

Chapter 10 Code and Component Reuse *303*

The ColdFusion <cfinclude> tag *304*
ColdFusion UDFs *304*
ColdFusion Custom Tags *305*
ColdFusion Components *309*
Dreamweaver Snippets *311*
Dreamweaver Library *315*
Dreamweaver Templates *319*
Dreamweaver Tag Libraries *327*
Summary *331*

Chapter 11 Working with XML in ColdFusion MX 6.1 ..... *333*

XML: What Is It? Why Use It? *333*
Dynamically Creating XML *336*
Using XML with External Sources *339*
Accessing and Manipulating XML Data *342*
Searching for and Extracting XML Data with XPath *347*
Transforming XML with XSLT *350*
Summary *355*

Chapter 12 Flash MX 2004, Web Services, and ColdFusion MX 6.1 ..... *357*

Flash Remoting *358*
Flash and ColdFusion Both Understand XML *358*
loadVariables *359*
Using Flash *359*
ActionScript 2.0 ..... *366*
Using Flash Components *368*
Publishing a Movie *369*
The (ColdFusion) Server Side of the Service *371*
Sending the Current Time to Flash *371*
Examining the Web Service in Flash MX 2004 Professional *372*
Displaying the Time from the Server *374*
Consuming a Web Service with Flash *380*
Describing Web Service Data in Flash *384*
Web Services Classes *398*
Summary *408*

Chapter 13 Case Study: A Complete ColdFusion-Based Web Site *409*

Running the Example Site *409*
Planning a Web Site *410*
Planning the Case Study Web Site *413*
Getting Started *418*
Building the Main Areas of the Site *425*
The Administration Site *435*
Summary *450*

Index *451*
